INTRODUCTION

The Borough of Selinsgrove is a riverine community located within the floodplain of the Susquehanna River, Penn's Creek and its tributaries which makes up approximately one third of the Borough, affecting residences, businesses, institutions, and infrastructure. A well-known characteristic of Selinsgrove Borough is that a portion of its residential population exists on a narrow 5-mile-long peninsula, called the Isle of Que, which is situated between Penn's Creek and the Susquehanna River. The Borough is a participant in the Community Rating System (CRS) program and maintains a Class 7 rating, giving flood insurance policy holders a 15% discount.

PROJECT DESCRIPTION

The Borough of Selinsgrove desires to complete a Borough-wide Flood Resiliency Study to improve its ability to withstand flooding events by enhancing knowledge, skills, and expertise of its current work force and beyond. The Flood Resiliency Study will expand upon the Borough's current administration of floodplain management to support loss avoidance, residential and business flood event impacts, reduced community lifelines, and increase resiliency as a whole. This Study will examine the best flood event procedures for the Borough to promote to its residents, property and business owners on what to do Before, During, and After a flood event, including but not limited to, 1.) Education before a flood event, 2.) Procedures to follow during a flood event, 3.) Closeout, clean up, reporting methods after a flood event to rapidly recover. This thought-provoking effort will stimulate Borough residents and property/business owners to examine their respective structure or situation and explore flood insurance or mitigation techniques specific to their need. The outcome of this endeavor will further strengthen the Flood Mitigation Assistance (FMA) program's ideology to mitigate and reduce damage/future losses to the National Flood Insurance Program (NFIP).

As an active and engaged CRS community, Selinsgrove Borough seeks that part of the Study's exploration shall lead to the creation of standardized/comprehensive flood related messaging and the generation of printed materials (signage, stickers, business cards, pre-printed packets), along with the investigation of the feasibility to design a website or space to hold all educational materials for residents to access. The tangible printed messaging products will be disseminated Borough-wide and also available at Borough offices to coincide with current and future CRS credited activities surrounding outreach projects.

SCOPE OF WORK

This section provides the general base scope of work for Selinsgrove's Flood Resiliency Study. Completing the following minimum objectives are a requirement of undertaking the Study:

Examination of Best Flood Event Procedures

The Consultant/Engineer must examine the best flood event procedures for Selinsgrove Borough to promote to its residents, property and business owners on what to do Before, During, and After a flood event. This includes, but is not limited to:

- Education before a flood event,
- Procedures to follow during a flood event,
- Closeout, clean up, reporting methods after a flood so the Borough as a whole can rapidly recover.

Creation of Standardized/Comprehensive Messaging

The Study shall lead to the creation of standardized/comprehensive flood related messaging and the generation of printed materials (signage, stickers, business cards, flyers, pre-printed packets) with an emphasis on these materials giving the Borough CRS credit for these activities, where applicable.

The ultimate goal of the printed material and published messaging shall support the NFIP's CRS program which is:

- Reduce and avoid flood damage to insurable property,
- Strengthen and support the insurance aspects of the NFIP,
- Foster comprehensive floodplain management.

Feasibility to Design Website/Location for Educational Materials

The Consultant/Engineer must investigate the feasibility of designing a website or a location for the Borough to hold all educational materials for residents, property and business owners to access.

Historic District Consideration

The Borough of Selinsgrove currently does not have boundaries for a Historic District; however, this is a topic that they wish to explore. The Consultant/Engineer must investigate the benefits of creating an overlay district that could encompass homes located in and out of the Special Flood Hazard Area (SFHA). This Study will be used to help the Borough begin identifying and laying the groundwork to create a Historic District Ordinance or create an overlay district to add to their current Zoning Ordinance. Special attention is to be given to best floodplain management practices within the Historic District and its contributing structures within SFHA in an effort to assist with flood remediation and access to potential funding sources.

Master Binder, Electronic Database, Physical Database

The Study shall identify ways to implement and create a 'master' floodplain binder, electronic database, or physical database for Borough Staff to utilize when implementing Before, During, and After procedures. Standard Operating Procedures must be created for use by the Borough, Floodplain Administrator, Public Works, Police, Fire Department, EMA Coordinator, Snyder County personnel, Mayor and Borough Council, Zoning Office, and Volunteers.

Public Meetings

The successful proposer shall coordinate and conduct three community meetings.

- The first meeting will be a kick-off meeting to include the successful proposer outlining the scope of work to be performed and data gathering/listening meeting with various stakeholders including but not limited to: elected officials, Borough staff, residents, and property/business owners.
- A Draft Report shall coincide with a presentation to the public to obtain comments and feedback from any/all interested parties. The comments and feedback are expected to be incorporated into the Final Report, along with the final presentation.
- The final public meeting will be a delivery of the Study's findings.

Final Report

A Final Report is a requirement of this Study and shall explore all items identified under the Scope of Work, at minimum. The successful proposer must produce three (3) hard copies of the Final Report upon completion, as well as an electronic copy. The Study will be a public document and shall be published on the Borough's website.

TERMS OF PAYMENT

The successful proposer will be required to enter into a written Professional Services Agreement with the Borough of Selinsgrove, which will incorporate the information contained in this Request for Quotations. The Consultant/Engineer will agree to a lump sum fee, which shall include all costs associated with the services outlined herein. Costs sometimes separately billed as reimbursable costs shall be declared and included in the lump sum amount of this quotation. Payment shall be made to the Consultant/Engineer on a monthly basis.

Invoices shall be provided setting forth the percentage of work completed to date, establishing the amount due based on the percentage completed, less any previous amounts.

MBE/WBE GOALS

It is the public policy of Selinsgrove Borough, to promote the opportunity for full participation by Minority and Women's Business Enterprises ("MBE's" and "WBE's") business concerns in all projects receiving federal funds. Selinsgrove Borough has established a Minimum Participation Level (MPL) of five percent (5%) for Minority Business Enterprises and three percent (3%) for Women Business Enterprises participation on projects with federal funding.
